

# Your opinion is needed!

In order to improve satisfaction with Dresden's sports and exercise facilities, the city of Dresden is conducting a survey on the topic of sports.

The opinions of people with a migration background, people with disabilities, women and children are particularly important so that the sports facilities can be further developed for them.

**We therefore ask you to forward this information within your networks and associations.**

You can fill out the questionnaire in German or English. It only takes 5 minutes. Participation is voluntary and anonymous.
